

3rd Grade News

IB Unit of Inquiry: **Who We Are**

We are studying the **systems of the human body**.

Central Idea: Understanding how our body functions helps us take care of ourselves.

Lines of Inquiry

- Body systems and their functions
- How body systems work together
- Choices that impact the body

Mark your calendar for Portfolio Night, March 7th. Students will lead a conference with their family, showing the work they have done and the progress they have been making.

READING

We have been reading about the different systems of the human body to increase our knowledge of form and function. We are making connections the different systems of the body and how the choices we make affect our health.

MATH

We are working on **fractions**. We will locate fractions on a number line and compare and order unit fractions. We will be working on measuring to the $\frac{1}{4}$, $\frac{1}{2}$, and whole inch. We will also be working on elapsed time. You can support your child's learning by asking them to tell time on analog clock.

Third graders should continue to **practice multiplication and division facts for 10 to 15 minutes every day at home**. Ideally, students should have mastered their 5s, 2s, 9s, 10s, 3s, and 4s. Students have materials in their home study folder to support their practice.

AND...

We look forward to seeing you here on **Portfolio Night!** Thursday, March 7 – come anytime 3:30 to 7:30!

Upcoming Events

Friday, March 1

Coffee, Tea & IB and
All-School Kindness Assembly
